XM25 Semi Automatic Airburst Weapon

XM26 12 Gauge Modular Accessory Shotgun System

XM320 40mm grenade launcher (replacing the M203)

PEO Soldier's mission is to arm and equip Soldiers to dominate the full spectrum of peace and war, now and in the future. To achieve this mission, the Army is treating the Soldier as a System, in the same sense that larger weapon platforms such as tanks, howitzers, and aircraft function as systems and integrate with other systems. All aspects of Soldier equipment are developed to be integrated, modular, interoperable, and mission-tailorable.

The result is a single integrated combat system that enhances Soldier performance in all critical areas: increased effectiveness, decreased load, and improved mission flexibility.

By managing the Soldier as a System, PEO Soldier will save Soldiers' lives, improve their quality of life, and increase their combat effectiveness.

Project Manager Soldier Weapons (PM SW) supports Soldiers through the development, production, and procurement of future and current weapon systems, ammunition, and associated target acquisition/fire control products. Soldiers are equipped with the best products industry has to offer, resulting in decisive overmatch capability through increased lethality and range, as well as decreased weight. In addition to weapons and ammunition, PM SW manages development and procurement of suppressors, accessory kits, optics, tripods, mounts, and binoculars.

Two Product Managers under PM SW drive the Mission Product Manager Individual Weapons and Product Manager Crew Served Weapons.
